OBJECTIVE

Motivated BS Computer Science graduate currently pursuing an MS in Data Science, with hands-on experience in machine learning, data analysis and full stack development gained through internships and projects. Looking for an opportunity where I can apply my technical and analytical skills to solve real-world problems, contribute to a team and keep growing in data science and AI.

INTERNSHIP EXPERIENCE

FEB, 2025 - APR, 2026

Full Stack Developer Intern | Pakistan Software Export Board

- Built and maintained full-stack modules using React.js and Laravel with clean UI and scalable backend logic
- Worked with MySQL, API integration and Git to support team projects and smooth application performance

Web Development Intern | Hidaya Institute of Science and Technology

- Worked on WordPress, PHP, HTML, CSS and JavaScript (basic level)
- Assisted in developing and maintaining website pages and improved understanding of CMS and web structure

WORK EXPERIENCE

JUN, 2026 - OCT, 2026

Phone Banking Officer | The Bank of Punjab

- Handled customer queries and complaints, and managed customer data accurately using CRM systems
- Strengthened communication, problem solving and ability to work under targets

EDUCATION

Master of Science in Data Science | NED University of Engineering & Technology, Karachi | 2026 - 2028 (Expected)

Relevant Coursework: Machine Learning, Data Mining, Big Data Analytics, Statistics & Probability, Data Visualization

BS Computer Science | University of Sindh, Jamshoro | CGPA 3.13

SKILLS

- **Programming:** Python, R, SQL, PHP, JavaScript
- **Data Science & ML:** Machine Learning, Data Mining, Statistics, Data Cleaning, EDA, Model Evaluation
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Data Visualization & BI:** Tableau, Power BI, Excel
- **Tools:** RStudio, Jupyter Notebook, Google Colab, VS Code, Git/GitHub, MySQL
- **Soft Skills:** Communication, problem solving, teamwork, quick learner

PROJECTS

Customer Churn Prediction | Machine Learning

Built a classification model in Python (Pandas, Scikit-learn) to predict customer churn; compared Logistic Regression, Random Forest and XGBoost using cross-validation, precision, recall and F1-score.

Sales Analysis & Interactive Dashboard | Data Science

Cleaned and analyzed sales data using Python and SQL, performed EDA and built interactive dashboards in Power BI / Tableau to track revenue, trends and top products.

AI Document Q&A Chatbot | Artificial Intelligence

Developed an NLP-based chatbot using Python, embeddings and an LLM API that answers questions from uploaded documents; deployed with a Streamlit interface.

Online Exam System | Web Development

Developed a secure platform for conducting online exams, reducing manual processes

Blog Management System | Web Development

Built with PHP, MySQL, HTML, CSS and JavaScript with user authentication, admin panel and CRUD operations

SportShop E-commerce Website | WordPress / WooCommerce

Complete WordPress/WooCommerce store with product browsing, cart, secure checkout and inventory management

CERTIFICATES

- Web Software & Mobile Development Course - NAVTTC
- ML with Python - Coursera
